Paediatric Mobility

permobil

Our personal approach makes all the difference.

Here at Permobil, we take a personal approach to mobility and seating. This means that every solution we create is inspired by the real lives of people with disabilities and their families. Each of our employees strive every day to solve the challenges of mobility, positioning, comfort, and safety. These are challenges that our users face every day.

It also means that, no matter what our users are striving for, we are there to support them using the latest technologies and clinical evidence. We believe that, "Every person with a disability has the right to have his or her needs compensated as far as possible by aids with the same technical standards as those we all use in our everyday lives" - Dr. Per Uddén, Permobil Founder.
