

Permobil

M4 Nexa[®]

permobil

Compact without compromise

The M4 Nexa is a compact power wheelchair with advanced seating that moves with the body, providing enhanced accessibility, more independence, and a personalised fit.

The next generation power wheelchair from Permobil

With its compact base and a low seat-to-floor height, M4 Nexa helps users navigate everyday environments more easily, while offering full power seat functions without compromise. Quieter driving and braking help create a smoother, more discreet mobility experience throughout the day..

Sit better, feel better, live better

M4 Nexa comes with a new biomechanical seating system designed to maintain a supported position with minimal displacement as power seat functions are used. The seating system allows for easy and stepless adjustment of seat width, depth and armrest, accommodating changes in body size, posture, function, and lifestyle. Seat depth can be adjusted while the user remains seated, helping reduce interruptions for users as needs change.

Designed to reduce downtime

Service and reconfiguration are designed to be simple, with improved battery access, protected cabling, fewer components, and efficient seat adjustment using only two Allen keys.

Connectivity for more control

With Permobil +Connect, M4 Nexa supports remote insights, proactive service, and wireless programming. The MyPermobil app gives users practical information such as battery range, distance, seating behavior, and the ability to personalise LED lights.

Specifications

Max. user weight	136 kg
Max. speed	10 km/h
Battery	52 Ah/68 Ah
Range (52 Ah battery)	33 km*
Weight incl. batteries 52 Ah/68 Ah	144 kg (52 Ah) 160.5 kg (68 Ah)
Obstacle climbing	70 mm
Ground clearance	74 mm
Base width	540 mm
Base length	850 mm
Seat depth	250–560 mm
Seat width	300–560 mm
Seat-to-floor height	390/430 mm
Back frame height	Low 300–410 mm** Standard 460–560 mm
R-net electronics Power Platform	120 A
Crash test ISO 7176-19:2022 tie-down	Yes–max 136 kg user weight
Tested according to EN12184:2022 CE	Yes

*Driving range (Actual driving range will vary based on driving, battery conditions and terrain)

**To fit back support sizes
