COMFORT
CURVE

Comfort

Acta-Back®

The Acta-Back® facilitates a proper positioning of the pelvis.

Moldable support

The moldable stays allow for easy on- the-spot adjustments to accommodate a variety of spinal curvatures, from the thoracic down to the lower lumbar region and for continual support of changing conditions.

Comfort

Acta-Relief™

The Acta-Relief® uses the Boa® system to accommodate deformities and allow for immersion through the shell creating even pressure along the entire back. It is designed to effortlessly adjust and bring comfort and support to the lower and upper thoracic regions.

Convenient and secure customizable fit

Each click of the Boa® reel offers one millimetre of precision fit adjustment. It delivers smooth, even adjustment with no pressure points for maximum comfort.

The Boa® closure system offers an adjustment solution free of straps, ratchets, and fasteners. Once the Boa® reel is locked into place, it stays that way.

Acta-Back and Acta-Relief is exclusively offered on the Permobil M1.

Compass® 4 Hardware

The patented Compass® 4 Hardware is strong, light, and independently adjustable in depth and angle of recline. The Compass® 4 Hardware is easy to adjust and has a wide range of motion.
